

LAQSH Job Skills Academy- Punjab August 2023

In Service training and induction of Electronics & Hardware Vocational Trainers

A two-day vocational training program was held at RICM Chandigarh Sector 32, Punjab from 26.06.2023 to 28.06.2023 on **Electronics and Hardware trade**. The objective of this program was to give training to 31 newly appointed vocational trainers from this trade; to brief them about the job roles they were training the students on; to make them understand the work of a vocational trainer as well as the strategic goals and objectives of the NSQF program.

This program was funded by Samagra Shiksha Abhiyan Punjab and organised by the LAQSH Job Skills Academy Pvt Ltd team.. All 31 newly appointed vocational trainers along with 2 co-ordinators Simranjit Singh and Gurjeet Singh came to Chandigarh to attend this training program. Hostels were arranged for these 33 people to stay for along with food.

This is the first time an offline training program has been organized since covid. The last such program was held in 2017. After that all the training programs were held online. Needless to say, there was a high level of communication and interaction between trainers during this training program.

Instructors trained the vocational trainers on theory and practicals. Each day there were 2 sessions, one in the morning, and another in the afternoon.

DAY 1

On the first day in the morning session the basics of electronics was covered, where topics such as introduction to electricity, basic electrical terms, safety measures were covered.

In the afternoon session LED bulbs was the topic. How LED bulb works, its advantages, identifying problems, fixing common problems were discussed.

Placements 2022-2023 academic session

As the 2022-2023 academic session comes to an end, it's time to focus on the placement of our National Skills Qualifications Framework (NSQF) students who have successfully completed their 12th-grade studies. These students have undergone specialized vocational training and are now equipped with practical skills that make them valuable assets in the workforce.

In this academic session there were 1078 students. Out of them 962 students were of age above 18 years. Total of 93 students opted for placement and we are delighted to share that 87 of our students from the 2022-2023 session have been successfully placed. Among these 62 students are working under employers, and an impressive 25 students have chosen the path of self-employment.

This accomplishment reflects the dedication and hard work of our students, as well as the effective training and guidance they received during their time with us. The fact that a significant number of students have opted for self-employment showcases their entrepreneurial spirit and the practical skills they've gained through our vocational programs.

We will share more details on the path these students have chosen in our next issue but here are some highlights:-

- * Jaswinder Singh from GSS Saidewala school got selected in Jazzy Sale purchase, Saidewala and now getting Rs 7500/- monthly salary.
- * Gurpyar Singh from GSS Jourkian school also got recruited in Global patient care clinic

and is earning Rs 15000/- per month. That is such good news.

* From GSSS TALWANDI CHAUDRIAN school two students Supreet Kaur got selected in Kapoor Cloth House and Lovepreet Singh in Dashmesh Auto repair and are earning 4000 and 5000 rupees per month respectively.

* Hardeep Singh from GSSS Rureke Kalan Nabard school got a job in Aluwalia petrol pump, Barnala and is earning Rs 10000/- monthly.

* Similarly, two students from GSSS Chawinda Devi school got recruited through this program. They are Pawandeep Singh who is currently working at Sangam Radio & TV center and getting a salary of Rs 12000/- monthly. And Ankush kumar who got a job at Gill furniture house with a Rs 13500/- salary per month.

* Twinkle from GSSS boys Guruharshai school got a job at Sanjeevani Hospital with a salary of RS 4500/-.

* Karamveer Singh from GSSS Pharwahi from Barnal district got recruited by Okaya Pvt. Ltd. Baddi with a Rs 12000/- monthly salary.

Like this total 87 students got placement. We are truly happy for them. This accomplishment reflects the dedication and hard work of our students, as well as the effective training and guidance they received during their time with us. The fact that a significant number of students have opted for self-employment showcases their entrepreneurial spirit and the practical skills they've gained through our vocational programs.

LAQSH Job Skills Academy- Punjab August 2023

Continuation from page 1

DAY 2

On day two, motors, electric fans, solar panel and installation were covered. Key points highlighted were on installation of solar panels involving several steps to ensure proper placement, wiring, and functionality. Some assignments were assigned to vocational trainers on that day.

In the afternoon session there was a recap of all the topics that were taught in these two days. The Vocational Trainers had to review the key concepts they had learnt and make presentations to the class. This further reinforced the learning. In the end there was a Q&A session, where participants asked questions and cleared any doubts they had.

During these 2 days of training period, instructors made sure training was engaging and trainers were able to understand everything. Instructors mainly focused on practical learning that is why various instruments and appliances were used during the training period ensuring vocational trainers learn everything thoroughly and practically.

From the feedback form collected after the program it was clear that trainers learnt very valuable information from this training. This training program gave them a basic idea about how to teach students, what are their career goals, and their role as a vocational trainer.

Throughout the training, it was emphasized on how important safety precautions, hands-on learning, and real-world problem-solving are. Practical exercises should be a significant part of each day's session to ensure participants gain practical skills. Additionally, participants were provided with reference materials, such as repair manuals and troubleshooting guides, for future reference.

The training program has surely enhanced their skills and knowledge which will help them in their vocational trainer roles. They were very happy with the instructors whom they said were very helpful and supportive, clearing every doubt they had. All the sessions were very engaging and informative was the overall feedback. The Vocational trainers were also very happy to have got the chance to interact with other trainers. This will be very important in the future as they support one another. They also were appreciative of the food and accommodation that was provided to them. Through this training, vocational trainers were taught to aim to bridge the gap between theoretical knowledge and practical application, enabling the students to excel in the Electronics Trade field. This is very important as our vocational trainers' guidance and expertise will play a pivotal role in our students' learning journey.
